

Company Overview

Nortel Government Solutions

Serving the United States Government defense, civilian and intelligence agencies, Nortel Government Solutions delivers the services expertise, mission-critical systems and secure communications required to ensure the safety, livelihood and well-being of citizens.

Nortel Government Solutions offers a broad portfolio of industry-leading platforms, advanced technologies and customized services for engineering, deploying and managing mission-critical systems and networks in support of your critical initiatives. By choosing our solutions, you can leverage and evolve your current investment to streamline communications, protect important data and increase workforce productivity, while saving operations costs and taxpayers' dollars.

Advanced technologies and expert services, combined with extensive network and integration experience in the Government domain, enable Nortel Government Solutions to offer you a one-stop shop for end-to-end mission-critical needs.

A full life cycle network-centric integrator

The network is an enabling technology for improving government effectiveness. Nortel Government Solutions combines 110 years of network systems innovation with extensive experience developing mission applications for Government.

Expert solutions — at your service

From initial planning to implementation to full lifecycle support, Nortel Government Solutions partners with you to bring unprecedented value to a range of strategic, operational and tactical IT projects.

Our business operations capabilities assist in day-to-day operations, from acquisition, competitive sourcing, financial and capital planning to ongoing program management of operations — ensuring that you meet your mission-critical objectives.

The network and systems engineering and management team has engineered and managed some of the world's largest multi-vendor networks and migrated them to best-in-class solutions.

Our customized software design, secure data management and seamless legacy integration services have enabled agencies like yours to accelerate the delivery of advanced systems such as multimedia collaboration for increased worker productivity and efficiency.

A trusted partner with the leadership, skills and knowledge to deliver — like no other

Thanks to a custom software solution designed and developed by Nortel Government Solutions, a first responder agency provides a quicker response that could result in lives being saved while minimizing property losses. Shaving seconds off response time is crucial to the service they provide to citizens.

Finally, Nortel Government Solutions offers information assurance, biometric applications, encryption and tracking technologies to protect your most critical assets — without compromising the flow, timeliness and integrity of information.

Advanced technology — for everything mission-critical

Nortel Government Solutions' advanced technology innovation encompasses industry-leading platforms and an impressive partner network that forms a unique technology powerhouse — ensuring best-in-class networking solutions.

Nortel Government Solutions' renowned converged multimedia communications solutions help reduce cost and network complexity while enabling advanced Voice over Internet Protocol (VoIP) and collaboration applications for improved citizen service levels and increased productivity. Our secure mobility solutions enable wireless access for integrated mobile defense and response systems to maintain critical operations and improve workforce efficiency.

Our resilient, high-capacity broadband solutions deliver survivable voice and data services across government networks. Cutting-edge security solutions combined with advanced biometric, encryption and

Everything under control

The principal U.S. Government agency responsible for protecting the health and safety of all Americans chose Nortel Government Solutions for their mission-critical communications to keep their employees connected — on their campus, in the field and in an emergency.

tracking solutions protect your network infrastructure, enabling real-time surveillance and enhanced cyber security for trusted inter-agency communications.

A committed Government partner

Serving citizens

Every day Government agencies and the citizens they serve place trust in Nortel Government Solutions systems to assist law enforcement and public safety first responders, and securely move people and goods. For example, a Nortel Government Solutions system ensures safer skies by helping to process all airport screener applicants throughout the United States. And a Nortel Government Solutions system tracks and assures safe movement of controlled prescription drugs across the United States.

Supporting national defense

Our military and joint commands of the national defense community rely on Nortel Government Solutions to deliver secure, interoperable and flexible communications systems to meet day-to-day and emergency needs.

A trusted supplier and the developer of the U.S. Department of Defense worldwide Defense Switched Network (DSN), Nortel Government Solutions is now transitioning the Department's network to leading-edge VoIP. As the first networking vendor to provide an end-to-end VoIP solution certified by the U.S. Defense Department Joint Interoperability Test Command (JITC), Nortel Government Solutions knows what it takes to deliver secure, reliable communications systems.

Guarding intelligence

Protecting the United States' national interests and underlying information systems is vital to our national security and economy. Through its intelligence practice, Nortel Government Solutions works closely with the intelligence community to enhance its performance and efficiency with secure communications and advanced technologies.
